

FOR IMMEDIATE RELEASE

AutoNation
IMAX® 3D Theater
at the MUSEUM OF DISCOVERY AND SCIENCE

THE DIGITALLY REMASTERED EPIC MOUNTAIN ADVENTURE *EVEREST*, NARRATED BY LIAM NEESON, WILL BE PREMIERING ON THE GIANT SCREEN AT THE MUSEUM OF DISCOVERY AND SCIENCE (MODS) AUTONATION® IMAX® 3D THEATER BEGINNING FRIDAY, FEBRUARY 18

The digital release of MacGillivray Freeman's record-shattering documentary celebrates the 25th anniversary of its historic IMAX® filmmaking expedition to the mountain's summit.

ALSO PREMIERING AT AUTONATION® IMAX® 3D THEATER AT MODS IS THE CAPTIVATING AND THRILLING DOCUMENTARY, *IRELAND*, NARRATED BY LIAM NEESON ON THURSDAY, MARCH 17

The stunning natural wonders and rich, cultural heritage of the Emerald Isle come alive in this visually stunning cinematic experience.

FORT LAUDERDALE (February 16, 2022) – The recently remodeled AutoNation® IMAX® 3D Theater at the Museum of Discovery and Science (MODS) featuring new premium seating will premiere two epic adventure documentaries narrated by Liam Neeson, *Everest*, opening on Friday, February 18, and *Ireland*, opening on Thursday, March 17. The Theater features new rocker seats that feature a smooth glide with a flip-up cupholder arm allowing for companion seating.

A new generation of South Florida audiences will enjoy *Everest*, MacGillivray Freeman's epic mountain adventure, at the AutoNation® IMAX® 3D Theater at MODS. The blockbuster giant-screen documentary has been digitally remastered in 16k resolution in celebration of the 25th anniversary of the historic filmmaking expedition that captured the first-ever IMAX® images from the top of Mount Everest.

Narrated by internationally acclaimed actor Liam Neeson and featuring the music of George Harrison, *Everest* is the dramatic true story of a team of four climbers who ascended Mount Everest just days after fellow mountaineers and friends died in the 1996 Mount Everest disaster. The film is a story of hope, strength, and triumph in the wake of tragedy, showing audiences the true power and resilience of the human spirit.

"Everest captured the world's imagination when it was released nearly twenty-five years ago, and this new edition will allow a new generation to be inspired by the film's emotional story of human triumph over adversity," said **producer and director Greg MacGillivray**. *"With the very latest in 16k digital scanning*

technology, the film will look as if it was filmed yesterday, with spectacular sharpness, clarity and contrast in the images. Audiences will feel like they are on the summit, standing on top of the world.”

To prepare the film’s pristine new 16k digital images, the MacGillivray Freeman post-production team is using the same film scanner that was custom-made for the filmmakers of *Apollo 11* to digitize NASA’s 70mm archival footage from its mission to the moon.

“*Everest* is an important part of giant-screen filmmaking history,” said **Shaun MacGillivray, president of MacGillivray Freeman Films**. “Its unprecedented success brought a new audience to giant screen theaters and introduced them to the powerfully immersive experience of these large-format films. We’re excited to share this new digital version with a whole new audience.”

“We are ecstatic to bring the remastered epic film, *Everest*, to our guests, giving them a front row seat to the historic documentary by Academy Award-nominated filmmaker MacGillivray Freeman Films,” said **Joseph P. Cox, president and CEO of the Museum of Discovery and Science**. “At MODS, our mission is connecting people to inspiring science, providing guests with the opportunity to explore the unknown and be part of something bigger than themselves – this film does just that by taking the viewer on the explorational journey to a place very few people will ever visit.”

Also premiering on the AutoNation® IMAX® 3D Theater’s giant screen on Thursday, March 17 is ***Ireland. Ireland***, also narrated by Liam Neeson, explores the natural wonders and rich, cultural heritage of the island of Ireland, from Trinity College Library and the world’s most famous illuminated manuscript, The Book of Kells, to such spectacular natural landmarks as the giant Cliffs of Moher, the volcanic Giant’s Causeway and the rugged Skellig Islands where researchers are studying local puffins. Led by Irish writer Manchán Magan, violinist Patricia Treacy and four Irish teens looking to connect with their Irish heritage, audiences will rediscover the vibrant traditions, language, and sacred customs of this ancient land.

“Ireland has long captivated the world’s imagination with its rich history and picturesque landscapes, and with this film we hope to share with audiences all the wonder and cultural diversity that makes the island of Ireland so unique and special,” **continued MacGillivray**, “Our story intertwines Ireland’s ancient past with its vibrant future, and I hope the film ignites a new appreciation for the vast, natural beauty and fascinating, cultural traditions of this magical place.”

“There is a movement in Ireland to reconnect with our heritage, to rediscover what it means to be Irish, and I am delighted to help bring the joy and diversity of all that Ireland has to offer, both the old and the new, to IMAX and giant-screen audiences worldwide,” **said internationally acclaimed actor Liam Neeson**. “As viewers experience Ireland’s great beauty and humanity on the world’s largest screens, they will fall in love all over again.”

“This film explores the natural wonders and rich, cultural heritage of the island of Ireland,” **continued Cox**. “And we are excited to bring this captivating and thrilling journey to our guests, giving them the opportunity to explore and experience everything Irish from the Cliffs of Moher and Giant’s Causeway, to observing the comical puffins of Skellig.”

The AutoNation® IMAX® Theater at the Museum of Discovery and Science is located at 401 SW 2nd Street in Fort Lauderdale. For showtimes, please visit [mods.org/showtimes](https://www.mods.org/showtimes). Private screenings are available, please inquire by emailing booking@mods.org.

Everest is family-friendly and has a run time of 40 minutes. The film is a MacGillivray Freeman film presented by Polartec and parent company Milliken. For more information, please visit everestfilm.com.
